ELECTRONIC FILING

Ms. Marlene H. Dortch, Secretary
Federal Communications Commission
The Portals, 445 12th Street, S.W.
Washington, D.C. 20554

Re: IB Docket No. 02-10
Ex Parte

Dear Ms. Dortch:

On February 25, 2005, Jose Albuquerque and Abdolmajid Khalilzadeh of PanAmSat Corporation ("PanAmSat") and the undersigned representing PanAmSat had a phone call with International Bureau representatives Howard Griboff and Paul Locke. The following issues relating to the Report and Order in the above-referenced proceeding were discussed:

1. The relationship between the requirement to point with an accuracy of within .2 degrees and the requirement for shutdown if mispointing exceeds .5 degrees.
2. The extent to which the off axis standard that the Commission adopted takes into account that there could be mispointing.
3. Whether when the Commission states that C-band stations will be secondary (on the receive side) when in motion, it means that they will

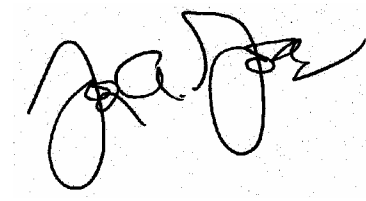

Ms. Marlene H. Dortch

Page 2

be secondary only vis-à-vis fixed service stations, or whether they also will be secondary vis-à-vis other fixed satellite service stations.

4. The extent to which ESVs are protected on the receive side against interference from adjacent satellites.

Please direct any questions concerning this filing to the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Godles", with a stylized flourish at the end.

Joseph A. Godles
Attorney for PanAmSat Corporation

cc: Howard Griboff
Paul Locke
